Reading is an activity people enjoy a lot in their free time. Some like reading newspapers, and others enjoy novels or comic books. I like reading about the lives of great people. This always gives me a lot of ideas on how to make my own life better.

Great people are remembered not because they were handsome or beautiful, but because they did not give up when their lives were difficult. They used every opportunity to change their lives and make the world better. One good example is Orville and Wilbur Wright, the two brothers who invented the airplane. The plane has made the world into a small village. Hard work, not good luck, is the reason why the Wright Brothers could invent this convenient machine and become remarkable people. Today we still remember them when we see planes in the sky.

When I fell sad, stories of great people always help me feel better. This is why I enjoy reading about great people's lives.

During the past one hundred years, there have been many inventions that make our life much easier and more interesting. TV is one of them. Many people enjoy watching TV for fun. Some even believe that TV has made their children smarter because there are all kinds of information on it — news, science, sports, music, and language. Children can learn a lot from TV in a short time without going out. Many parents are happy about this because they themselves are too busy to spend time with their children.

But we have found that more and more children today have problems with reading, thinking, and concentrating even though they have watched a lot of TV. In fact, getting much information from TV does not mean real learning. Children who watch too much TV do not have enough time to think or to communicate with people. Besides, it takes time and love for children to grow up. What children need most is their parents. Parents give children love, and help them solve problems in the right way. We should teach our children what real life is without TV. After all, machines should not be more important than people.

48. What does "this" mean in the first paragraph?
(A) Watching TV to relax.
(B) Doing well on school tests.
(C) Learning quickly from TV.
(D) Spending time with children.
49. What does the writer think of TV?
(A) It takes away children's opportunity to think.
(B) It gives useful tips for becoming better parents.
(C) It does not give enough information to people today.
(D) It is the most important invention of the past one hundred years.
50. What can we conclude from the reading?
(A) People in the future will enjoy more new inventions.
(B) Children should learn more from their parents than from TV.
(C) Students who watch TV are smarter than students who do not.
(D) Watching TV is a good way for children to understand real life.
