### 摘要

隨國際網路之世界化，不同語言之電子地圖可提供不同國家人民瀏覽，本研究嘗試利用國際網路地理資訊系統，建置一套多語言之電子地圖瀏覽系統，結合 Java 及網路語言使得不同語系之電子地圖可自由切換及放大縮小，此經驗可提供於休閒旅遊之電子地圖建置參考。

### Abstract

As the internet became worldwide, the E-maps of different languages allowed people from different countries to browse. This research tries to utilize the internet GIS to establish the multiple the Multiple Language E-Map browsing system. By combining the JAVA and network language, the E-Map with different languages could be freely switched, magnified and narrowed. This experience could provide the reference of building the E-Map of leisure travel.
